Redish's Principles used:

1. **Start with the users and their questions.**

   Each section or step answers a single question users might ask during the process of downloading Steam and starting their gaming journey.

2. **Use action-focused, plain language.**
   Steps begin with verbs, have short sentences and use minimal technical jargon.

3. **Make content easy to scan:**
   a. Clear Headings
   b. Bulleted Steps
   c. White Space
   d. Lists instead of paragraphs
4. **Keep only the information that people need.**
   No extra history or information about steam, just straight to the action.
5. **Integrate visuals at point of action.**
   Screenshots appear immediately after the steps that need visual support.
